

**IN THE CLAIMS**

**Please amend the claims as follows:**

1 (Currently Amended): A print control system for processing a print request, comprising:

a print dialogue box displayed in response to the print request and configured to at least display print settings for a print job, modify the print settings, and confirm the print settings for the print job; and

a printing information dialogue box configured to automatically display, upon a confirmation of the print settings for print job in the print dialogue box and prior to processing of the print job for printing, a synopsis of the print settings for the print job including at least an indication of a paper selection,

said printing information dialogue box having a control to direct said print job.

2 (Original): The print control system of Claim 1, wherein the print dialogue box is configured to select at least one of a printer, a number of copies to be printed, collation of the copies, a document to be printed, a range of pages within the document to be printed, a number of document pages per printed page, and a page scale size.

3 (Original): The print control system of Claim 1, wherein the print dialogue box is configured to cancel the print job.

4 (Original): The print control system of Claim 1, wherein the printing information dialogue box is configured to enable issuance of the print job.

5 (Original): The print control system of Claim 1, wherein the printing information dialogue box is configured to enable resubmission of the print job.

6 (Original): The print control system of Claim 1, wherein the printing information dialogue box is configured to enable cancellation of the print job.

7 (Previously Presented): The print control system of Claim 1, wherein the printing information dialogue box is configured to display a synopsis of the print settings including at least one of printer name, printer ports, timeout settings, color management, output printer settings, banner settings, paper selection, document size, print size, paper type, printer tray, print resolution, edge smoothing flags, toner savings flag, graphics configuration, accessories, statistics, and watermark properties.

8 (Original): The print control system of Claim 1, further comprising:  
a print job dialogue box indicating that the print job is complete.

9 (Currently Amended): A method for processing a print request, comprising the steps of:

entering, by a user, a print request for a print job;

displaying, in response to the print request, a print dialogue box configured to at least modify print settings and confirm the print job;

confirming, by the user, a print setting confirmation of the print settings for the print job to be printed;

automatically displaying, upon receipt of the print settings confirmation in the print dialogue box and prior to processing of the print job for printing, a printing information

dialogue box with a synopsis of the print settings for the print job including at least an indication of a paper selection; and

directing, by a user selection in the printing information dialogue box, the processing of the print job.

10 (Original): The method of Claim 9, wherein the step of displaying a print dialogue box comprises the step of:

displaying a print dialogue box configured to display print settings for the print job.

11 (Original): The method of Claim 9, the step of directing the processing of the print job comprises the step of:

issuing the print job from the printing information dialogue box.

12 (Original): The method of Claim 11, wherein the step of issuing the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a print selection device.

13 (Original): The method of Claim 9, wherein the step of directing the processing of the print job comprises the step of:

canceling the print job from the printing information dialogue box.

14 (Original): The method of Claim 13, wherein the step of canceling the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a cancel selection device.

15 (Original): The method of Claim 9, wherein the step of directing the processing of the print job comprises the step of:

resubmitting the print job from the printing information dialogue box.

16 (Original): The method of Claim 15, wherein the step of resubmitting the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a modify selection device.

17 (Original): The printing method of Claim 16, wherein the step of resubmitting the print job from the printing information dialogue box further comprises the steps of:

redisplaying said print dialogue box;

modifying the print settings from said print dialogue box;

reconfirming the print job from said print dialogue box;

redisplaying, upon receipt of the reconfirmation and prior to issuing the print job, said printing information dialogue box; and

redirecting, by said user selection, the processing of the print job.

18 (Original): The method of Claim 17, wherein the step of redirecting the processing of the print job comprises the step of:

issuing the print job from the printing information dialogue box.

19 (Original): The method of Claim 18, wherein the step of issuing the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a print selection device.

20 (Original): The method of Claim 17, wherein the step of redirecting the processing of the print job comprises the step of:

canceling the print job from the printing information dialogue box.

21 (Original): The method of Claim 20, wherein the step of canceling the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a cancel selection device.

22 (Previously Presented): The method of Claim 17, wherein the step of redirecting the processing of the print job comprises the step of:

resubmitting again the print job from the printing information dialogue box.

23 (Previously Presented): The method of Claim 22, wherein the step of resubmitting the print job from the printing information dialogue box comprises the step of:

selecting again in the printing information dialogue box the modify selection device.

24 (Original): The printing method of Claim 9, further comprising the step of:  
displaying a print job dialogue box indicating that the print job is complete.

25 (Currently Amended): A print control system configured to process a print request, comprising:

means for requesting a print job;

means for displaying, in response to the print request, print settings;

means for modifying the print settings;

means for confirming the print settings for the print job;

means for automatically displaying, upon receipt of a print settings confirmation in the print dialogue box and prior to processing of the print job for printing, a synopsis of the print settings for the print job including at least an indication of a paper selection; and

means for directing the print job from said means for displaying a synopsis of the print settings.

26 (Original): A print control system of Claim 25, wherein means for directing the print job further comprises:

means for issuing the print job.

27 (Original): A print control system of Claim 25, wherein means for directing the print job further comprises:

means for canceling the print job.

28 (Original): A print control system of Claim 25, wherein means for directing the print job further comprises:

means for resubmitting the print job.

29 (Original): A print control system of Claim 28, wherein means for resubmitting the print job further comprises:

means for redisplaying, in response to a resubmission of the print job, print settings;

said means for modifying the print settings;

said means for reconfirming the print job;

means for redisplaying, upon receipt of a print job reconfirmation and prior to issuance of the print job, said synopsis; and

said means for directing said print job.

30 (Currently Amended): A computer program product configured to store program instructions on computer-readable medium for execution on a computer system enabling a computer system to process a print request by performing the steps of:

displaying, in response to the print request, a print dialogue box configured to at least modify the print settings and confirm the print settings for a print job;

automatically displaying, upon receipt of a print settings confirmation in the print dialogue box and prior to processing of the print job for printing, a printing information dialogue box with a synopsis of print settings for the print job including at least an indication of a paper selection; and

directing, by user selection in the printing information dialogue box, the processing of the print job.

31 (Original): The computer program product of Claim 30, wherein the step of displaying a print dialogue box comprises the step of:

displaying a print dialogue box configured to display print settings for the print job.

32 (Previously Presented): The computer program product of Claim 30, wherein the step of directing the processing of a print job comprises the step of:

issuing the print job from the printing information dialogue box.

33 (Original): The computer program product of Claim 32, wherein the step of issuing the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a print selection device.

34 (Original): The computer program product of Claim 30, wherein the step of directing the processing of a print job comprises the step of:

canceling the print job from the printing information dialogue box.

35 (Previously Presented): The computer program product of Claim 34, wherein the step of canceling the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a cancel selection device.

36 (Original): The computer program product of Claim 30, wherein the step of directing the processing of the print job comprises the step of:

resubmitting the print job from the printing information dialogue box.

37 (Original): The computer program product of Claim 36, wherein the step of resubmitting the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a modify selection device.

38 (Original): The computer program product of Claim 37, wherein the step of resubmitting the print job from the printing information dialogue box further comprises the steps of:

redisplaying said print dialogue box;

modifying the print settings from said print dialogue box;

reconfirming the print job from said print dialogue box;

redisplaying, upon receipt of the reconfirmation and prior to issuing the print job, said printing information dialogue box; and

redirecting, by said user selection, the processing of the print job.

39 (Original): The computer program product of Claim 38, wherein the step of redirecting the processing of the print job comprises the step of:

issuing the print job from the printing information dialogue box.

40 (Original): The computer program product of Claim 39, wherein the step of issuing the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a print selection device.

41 (Original): The computer program product of Claim 38, wherein the step of redirecting the processing of the print job comprises the step of:

canceling the print job from the printing information dialogue box.

42 (Original): The computer program product of Claim 41, wherein the step of canceling the print job from the printing information dialogue box comprises the step of:

selecting in the printing information dialogue box a cancel selection device.

43 (Previously Presented): The computer program product of Claim 38, wherein the step of redirecting the processing of the print job comprises the step of:

resubmitting again the print job from the printing information dialogue box.

44 (Previously Presented): The computer program product of Claim 43, wherein the step of resubmitting the print job from the printing information dialogue box comprises the step of:

selecting again in the printing information dialogue box a the modify selection device.

45 (Original): The computer program product of Claim 38, further comprising the step of:

displaying a print job dialogue box indicating that the print job is complete.
